

# 1. Objective

---

Get familiar with the Linux operating system environment through experiments and master the use of basic Linux commands.

## 2. Requirement

---

- Master the permission management of Linux files
- Master basic file and directory operations
- Linux user management
- File compression and archiving

## 3. Experiment Step

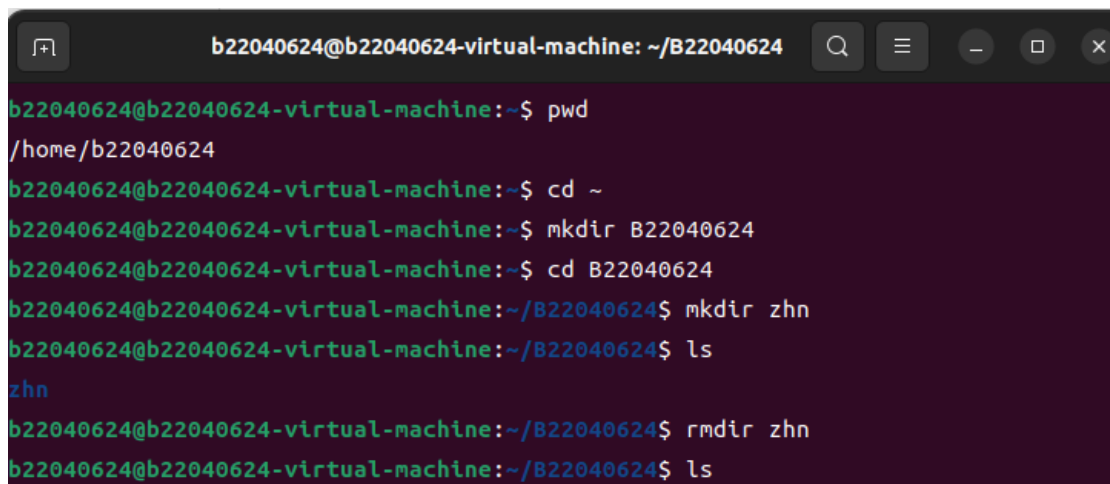

---

### (1) Directory Operation

Enter the following commands in sequence:

```
$pwd
$cd ~
$mkdir your_studentID
$cd your_studentID
$mkdir your_name
$ls
$rmkdir your_name
$ls
```

Save a screenshot of the above command along with the corresponding results, you must have your student number and name.

The screenshot shows a terminal window titled "b22040624@b22040624-virtual-machine: ~/B22040624". The terminal output is as follows:

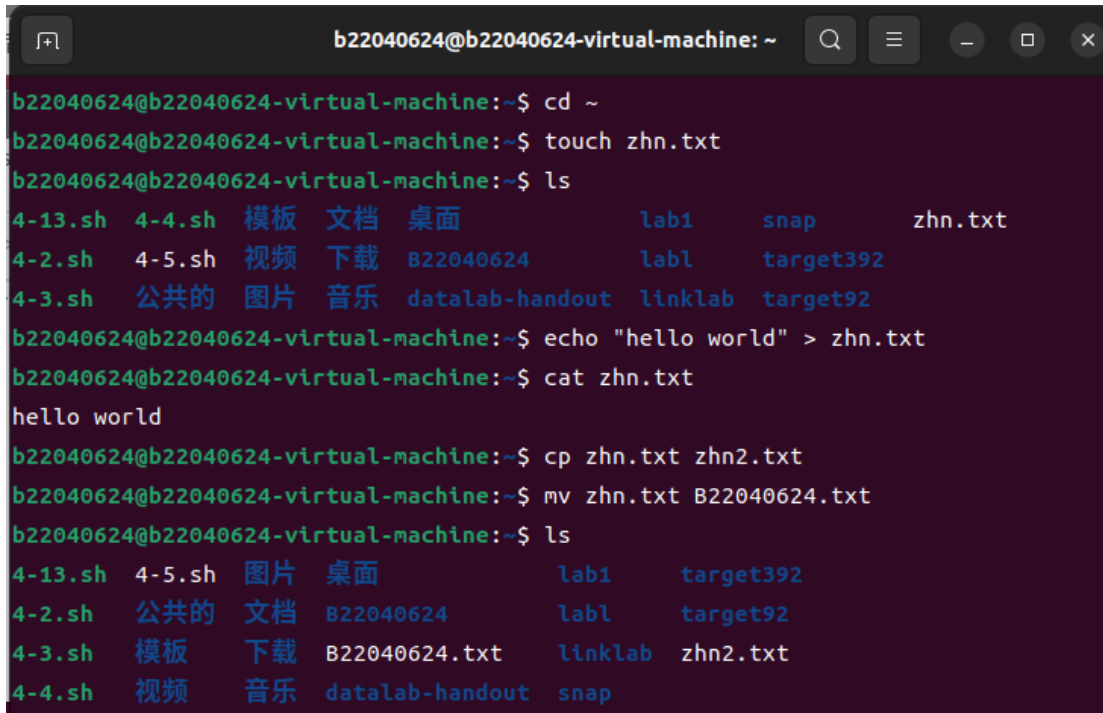

```
b22040624@b22040624-virtual-machine:~$ pwd
/home/b22040624
b22040624@b22040624-virtual-machine:~$ cd ~

zhn
b22040624@b22040624-virtual-machine:~/B22040624$ rmdir zhn
b22040624@b22040624-virtual-machine:~/B22040624$ ls
```

## (2) File operation

Enter the following commands in sequence:

```
$cd ~  
$touch yourname.txt  
$ls  
$echo "hello world" > yourname.txt  
$cat yourname.txt  
$cp yourname.txt yourname2.txt  
$mv yourname.txt yourstudentid.txt  
$ls
```

Save a screenshot of the above command along with the corresponding results, you must have your student number and name.

The screenshot shows a terminal window titled "b22040624@b22040624-virtual-machine: ~". The terminal displays the following commands and their outputs:

```

$touch yourname.txt  
$ls -l
```

View the properties of the file, including the owner user and the group to which the owner user belongs.

### ###(5) Other management

Create folder "others" in the main directory of the user, go to the folder, and create two files with the name of any file. Then run the following commands in sequence.

```
$tar -czvf backup.tar.gz others
$ls -l
$tar -xzvf backup.tar.gz
$ls -l
```

Observe changes in the process.

Create a textfile file and make it as follows:

```
no, I study in njupt.
this line ends with 00
this line ends with .00
I am 25 years old.
He is 15. It is 16.00
wy is the short of my name.
```

Search for all lines beginning with the character "n" in the file textfile

```
$ grep '^n' textfile
```

Search the textfile for all lines ending in ".00"

```
$ grep '\.00$' textfile
```

Search for all lines in the textfile that contain the number 5, followed by the character ".", followed by any character

```
$ grep '5\..' textfile
```

Search for all lines starting with the characters "w" and "y" in the file textfile

```
$ grep '^[wy]' textfile
```

```
b22040624@b22040624-virtual-machine:~/others$ tar -czvf backup.tar.gz others
```

```
tar: others: 无法 stat: 没有那个文件或目录
```

```
tar: 由于前次错误，将以上次的错误状态退出
```

```
